

Mini Tubular Level Gauge

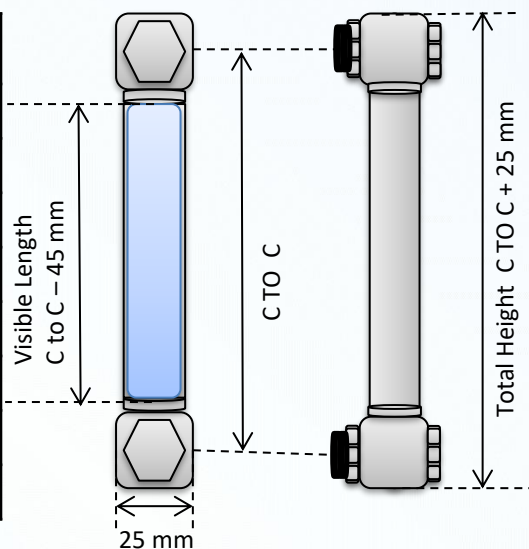

We are introducing our Side Mounted **Mini Level Gauge** to indicate the liquid level inside the tank with outside visual indication per requirement of users. It is very reliable & compact type level indicator for small tank level indication.

Construction:

It consists of rugged construction with borosilicate glass tube fitted between two metallic end blocks & banjo bolts through a set of 'O' rings. A sided guard is provided in the form a metallic tube enclosing the glass tube for protection from accidental breakage. The level indicator has two slotted windows for a viewing liquid level & scale shows tentative of liquid level inside the tank. Its mounted parallel to the tank, so as to form a closed loop.

Specification	
All Body Parts	MS/SS 304/SS 316
Process Connection	M12 Banjo Bolt
Glass Tube	16mm OD, Borosilicate
Glass Guard	MS/SS 304/SS 316
Scale	PVC Sticker
Max. Temp	200 Deg. C
Max. Pressure	5 Bar
Max. Length	600 mm

Model Identification :

MTLG -
